29er World Championships- Live Web Cast  
 Web Site Architecture/Development/Director "Live Web Cast"/Content Manager  
 July, '01

OBJECTIVES ⊙

The 29er Class Association objective was to bring the 29er World Championships to the world live on the internet.

SOLUTION ⊙

The biggest objective was to create a site where numerous content providers could add and update content without having to know any programming. The site required a high-end custom back-end where any user with a password could log in through a web browser, type a story and add photos. The site was a huge success and very well received by the competitors and fans.
