

CLIENT > Grubb & Ellis | Lewinger Hamilton
 PROJECT > Web Site Architecture/Development/Project Management
 DATE > Apr. '99

OBJECTIVES > Grubb & Ellis | Lewinger Hamilton approached us for a total redesign of their company web site. They wanted the site to be a more accurate reflection of their corporate image.

SOLUTION > With a very limited budget for the redesign the solution was to focus on the design itself. The goal was to create an image that reflected the success of Grubb & Ellis | Lewinger Hamilton as the top commercial real estate company in the Southwest. Additionally the site was created with the idea for future growth in mind. The site foundation was built so it can be easily expanded to new areas and carries the potential for automation.
